Antacid Antigas Tablets: Digene (Mint Flavor)

This analysis is based on the provided image and focuses on the visible information.

1. Identify the Tablets:

The image shows a blister pack labeled "Digene", indicating chewable tablets. The tablets themselves aren't visible.

2. Detailed Description:

- Name:** Digene (Antacid Antigas Tablets)
- Active Ingredients:**
 - Dried Aluminium Hydroxide Gel I.P.: 300 mg
 - Magnesium Aluminium Silicate Hydrate: 50 mg
 - Magnesium Hydroxide I.P.: 25 mg
 - Simethicone I.P.: 25 mg
- Uses:**
 - Relieving symptoms of heartburn, acid indigestion, and gas.
 - Commonly used for conditions like gastroesophageal reflux disease (GERD), peptic ulcer disease, and dyspepsia.
- Dosage:**
 - Adults: 2-4 tablets as required, to be chewed or sucked after meals and at bedtime.
 - Children: As advised by the physician.
- Side Effects:** (Common side effects of the active ingredients)
 - Constipation (aluminum hydroxide)
 - Diarrhea (magnesium hydroxide)
 - It's important to note that side effects can vary based on individual sensitivity and dosage.
- Interactions:**
 - Antacids can interact with various medications, potentially affecting their absorption. It's crucial to consult a healthcare professional if taking other medications alongside Digene.

3. Additional Details:

- Visual Features:** The packaging features a "High ANC" label, suggesting high acid neutralizing capacity.
- Regulatory Status:** Manufactured by Abbott India Limited. Specific regulatory information is not fully visible in the image.

4. Clarity and Accuracy:

This information is based on the provided image and general knowledge of antacid ingredients. Always refer to the package insert and consult a healthcare professional for complete and accurate information before taking any medication.
